

HEARD SEMINAR SERIES 2015

UPCOMING TALK

UNDERSTANDING THE DEMAND FOR HEALTHCARE

Health economics researcher, Mike Strauss, discusses the importance of understanding and creating demand for healthcare services, especially in the context of scaling up HIV prevention and treatment interventions in South Africa.

The talk will draw on evidence from a discrete choice experiment to determine preferences regarding HIV counselling and testing, and medical male circumcision among adolescents in high schools in rural KwaZulu-Natal.

Thursday, 3 September

University of KwaZulu-Natal,
Westville Campus,
J Block, 4th Floor

10 -11 am
